Steps to Register in Genius for RN Bridging / Re-Entry Program

Complete the registration form on our website. Are you a self-referred learner?

- If yes, upload your completed Self-referral form to your learner profile on Genius.
- If no, wait to hear from program administrative officers on next steps after they receive your referral from NSCN or Nova Scotia Health.

Once your eligibility for the program is confirmed, you will receive an email with instructions on next steps.

- You will need to upload 2 documents demonstrating proof of residency to your learner profile in Genius.
- Self-referred learners will need to upload evidence of English-language proficiency.

Once you have submitted the required documents for program acceptance, you will receive an email with instructions on required next steps before you begin the program.

- You will need to complete the Privacy and Confidentiality training module.
- You will need to upload the Pledge of Confidentiality, Consent to Release Information, HSPNet Consent Form, and Student Learner Placement E-Orientation to your learner profile in Genius. Your enrollment will not be complete until you meet these requirements.

You will be enrolled in the applicable Orientation course that aligns with your cohort (e.g., fall, winter, spring), and enrolled in your required courses. You will receive an email confirming each enrollment with start and end dates for each course.

- Begin working on required pre-clinical documents, which must be submitted within 2 months of beginning the program.
