WET MOPS & BUCKET WRINGERS

HYGEN™ CLEAN WATER SYSTEMS

FILTER BUCKET WITH WRINGER COMBO

- Revolutionary integrated filter for clean water, clean mops and clean floors all day long
- Easy to use - simply tilt bucket 90°, allowing the dirty water to transfer to the chamber with the filter, once water is completely transferred to filter chamber, rotate the bucket back to its original position, clean filtered water will flow back into mopping chamber, ready for mopping
- Improves productivity and reduces chemical waste and waste water
- Floor drain is easy to use and doesn't require any lifting
- Twin roller is designed to optimize wringing and requires 50% less force to wring than a traditional side press wringer
- Built-in scrubbers remove more dirt from mops
- Roller wringer is adjustable to accommodate mop's thicknesses and moisture level
- Lock'N Go kit allows mop/bucket wringer to be attached to a Rubbermaid janitorial car

MOPS, BROOMS & BRUSHES

PUSH BROOM DEGREES OF SWEEP

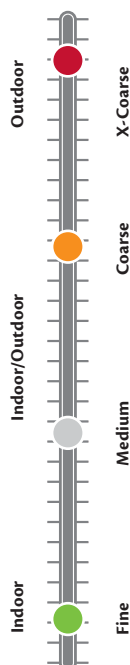

Push brooms are available in fine, medium, coarse, and extra-coarse. The scale is directly proportional to the size of dirt and the strength of the broom's fibres.

Fine sweeping: For sweeping dust and dirt on smooth indoor surfaces such as polished hardwood and vinyl. Fine fibres are flagged on the ends to increase softness and dust attraction when the broom glides across smooth hard indoor surfaces.

Medium sweeping: For indoors and outdoors on less smooth surfaces such as terrazzo, sealed or unsealed concrete. Medium fibres are used when a multi-purpose neutral sweeping action is required. When used outdoors, the broom works best on even surfaces with smaller debris.

Coarse sweeping: For heavier outdoor dirt and debris on uneven surfaces such as asphalt and concrete. These brooms offer a good compromise between surface drag and the ability to sweep larger sized material.

X-coarse sweeping: For outdoors on rough, uneven surfaces such as sweeping and pushing debris on streets or using in a landscaping application. These brooms have the most surface drag so they are harder to push, but move the largest size and amount of material possible.

SAFETY ORANGE PUSH BROOMS

- Fine and medium sweep brooms are used for sweeping dust and debris on smooth indoor surfaces such as warehouse floors
- Use coarse sweep brooms to move heavier debris on outdoor surfaces
- Bolt-on handle (**JB655**) and brace (**JB783**) sold separately; braces are recommended on push brooms 24" and over
- Brooms are pre-drilled for easy installation of brace and bolt-on handle
- Fibre colour is orange for high visibility in warehouses or road crews in construction applications

CHOOSING A CORN BROOM

Corn brooms are available in light, medium, heavy, and extra heavy-duty service. The scale is directly proportional to the weight, durability and the strength of the broom's fibre.

Light: Designed for indoor. This broom is often used as a lobby or dust pan broom to sweep smaller amounts of dirt.

Medium: Multi-purpose indoor broom that is lightweight and used as a commercial corn broom for office buildings.

Heavy: Good outdoor industrial quality broom. The construction has more weight and reinforcement, and is designed for durability.

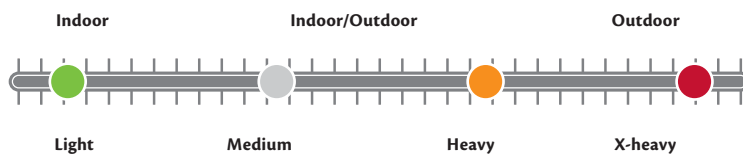

X-heavy: Mainly an outdoor broom and is the heaviest of our corn brooms. Use this broom to remove large amounts of dirt and snow from entrance ways.

HACCP & CLEANING SUPPLIES

Cleaning tools in our Food Hygiene section are manufactured specifically for food processing and other hygiene critical areas. The brush range complies with all existing Canadian, EU and US public health regulations and have been designed to allow sanitation managers to do their job with greater confidence, ease and efficiency.

As HACCP programs are increasing in importance in North America, the right cleaning tools are a key part of ensuring compliance with your company's HACCP program.

Food hygiene tools are made from materials deemed as safe and can come in contact with food or surfaces used in the production of food.

FOOD HYGIENE, COLOUR CODED PRODUCTS (HACCP)

Hazard Analysis and Critical Control Points (HACCP) is a guideline for ensuring hygiene safety in food processes.

The guideline analyzes possible chemical, physical, and biological hazards within processes that should prevent unsafe food from leaving the Critical Control Point (CCP) zone. HACCP can be implemented in any food sector from production to transportation. It encompasses a field-to-fork approach.

Colour coded hygiene tools provide clarity and control by monitoring CCP zones for specific, approved, colour coded tools.

The following colours are used in the food hygiene system.

HALOGEN LAMPS

Halogen lamps are incandescent lamps with the added benefits of greater efficiency, long life, and excellent lumen maintenance. Halogen lamps use a filament; but since it is sealed in a pressurized capsule containing halogen gas, the lamp provides brighter, whiter light, longer service life and improved energy efficiency. Halogen bulbs have a variety of uses such as accent lighting, directional lighting, and recessed lighting.

PAINT BRUSHES

China bristle: Carefully selected for proper stiffness and taper, Chinese hog bristle are best suited for spreading oil-based paints, enamels, stains, shellacs and epoxy coatings.

Nylon/Polyester: Multi-polyester and nylon filament tips provide extra wear and will give excellent service with all paints. All filaments are flagged and tipped for excellent paint pick-up and smooth application.

Polyester: A durable synthetic filament that smoothly spreads latex and oil-based paints equally well. Retains stiffness and flexibility in extreme hot weather conditions and gives fine service, easy to clean out.

Soft Hair: Fine animal hair brushes are essential for laying on exceptionally smooth lacquer, shellac, varnish and enamel finishes.

CEILING FANS

- A major source of untapped energy is available at the ceiling in most industrial and commercial buildings
- Air stratification causes heat build-up at the ceiling as much as 25 °F or more above floor level temperatures
- By installing ceiling fans, this warm air can be recirculated down to floor level to maintain a uniform air temperature from floor to ceiling
- The result saving can be as much as 30 %
- Electro-static white paint
- When ceiling fans are used for cooling people during the summer, they should be spaced 15' to 20' apart in the occupied area
- In warehouse storage areas, best results will be obtained if fans are mounted over aisle ways
- Fans should not be mounted less than 10' above the floor, the use of a safety cable is required on all ceiling fans

HEATSTAR CONTRACTOR SERIES – FORCED AIR KEROSENE HEATERS

- 110-115 V, 60 Hz
- Kerosene #1 fuel oil
- Large capacity fuel tanks
- Safe, shuts off w/loss of flame or power
- Maximum heat circulation, heavy-duty high output fan
- Made to last, durable steel construction
- Instant heat, economical, efficient and clean burning
- CSA certified

50 000 BTU

- Heats approximately 1200 sq. feet
- Runs up to 11 hours on full tank
- 4-gallon fuel tank
- Overheat safety shutoff
- Continuous ignition
- Weight: 36 lbs.
- Dimensions: 32" L x 14" W x 14.5" H

Model No. EA299

Price/Each \$334.46

75 000 BTU

- Heats approximately 1750 sq. feet
- Runs up to 11 hours on full tank
- 6-gallon fuel tank
- Overheat safety shutoff
- Continuous ignition
- Other features: illuminated on/off switch, fuel gauge, cord wrap, easy-off gas cap, drain plug, electric plug
- Weight: 43 lbs.
- Dimensions: 32" L x 14.25" W x 17" H

Model No. EA300

Price/Each \$358.73

Best for:

- Construction sites
- Agricultural
- Workshops
- Emergencies
- Industrial/commercial workspaces
- Remodeling jobs

125 000 BTU

- Heats approximately 3000 sq. feet
- Runs up to 15 hours on full tank
- 14-gallon fuel tank
- Overheat safety shutoff
- Continuous ignition
- Other features: illuminated on/off switch, fuel gauge, air pressure gauge, cord wrap, easy-off gas cap, dual powder-coated black handles, oversized pneumatic tires, drain plug, electric plug
- Weight: 74 lbs.
- Dimensions: 42" L x 18" W x 22.25" H

Model No. EA301

8" PLASTIC COM-PAX-IAL BLOWERS

- 1/3 HP, 115V motor
- The lightweight, corrosion, UV and chemical resistant polyethylene housing offers a superior design with durable construction
- The carry handle is molded into the blower
- This compact, super quiet unit features a polypropylene nine blade fan, a steel/powder coated grill
- The bottom enclosure ensures safe and convenient storage of electrical components
- Designed to work separately or with canister and ducting (statically conductive ducting for explosion-proof models)
- The quick-connect clipping system allows workers to attach canister, tools-free, to input side for powerful extraction or output side for ventilation
- Electric, explosion-proof single-phase motor includes NEMA rated 115 V plug for use with explosion-proof socket (sold separately). Meets Class I, Divisions 1 and 2, Groups C and D and Class II, Divisions 1 and 2, Groups F and G Hazardous

MVP MANHOLE VENTILATION PASS THRUS

- Designed to maintain and re-direct air flow with minimal restriction into manholes, sewers and tanks
- Innovative first manhole system that combines the low profile manhole air vent, 90° elbow and built-in mounting all into one easy assembly

MATERIAL

MVP:

- Linear Low Density Polyethylene (LLDPE)
- Recyclable
- Bright Yellow

Duct:

- Vinyl and polyester with PVC coating
- Compressible inner support coils
- Heat resistance up to 180°F

FEATURES

- Low profile elbow fits underneath the lower cross bar of the guardrail
- Manhole cover fits into flat channeled corners for stabilization
- Small storage bag holds ducting
- Quick release draw string to drop ducting into manhole
- Collapsible duct for easy entry springs back into shape once worker is down into the manhole
- Combines three components, the low profile manhole air vent, 90° elbow and built-in mounting all into one easy assembly
- Reducing overall size, storage and shipping cost
