Norwood Stain and Clear coat finish Maintenance

The Norwood Stain and Clear coat finish is a premium quality, high performance finish. However like all exterior stained product it requires regular maintenance.

Norwood recommends that all exterior surfaces be cleaned with mild soap and water and checked once a year for scratches, nicks, or lifting clear coat.

DO NOT use stronger solvents or abrasive type cleaners because they will damage the surface.

Cracks resulting from joint movement should be caulked with high quality caulking materials such as Dow-734 silicone.

Minor nicks, scratches and lifting clear coat should be cleaned and all loose top coat removed then it can be touched up with a good quality clear coat such Durathane or Minwax clear coats.
