

Dr. Jennifer Lange

Jennifer Lange was born and grew up west of the causeway! After completing her medical degree at the University of Saskatchewan, she moved to Cape Breton to finish her training in the family medicine residency program in 2008. Having met her husband in Cape Breton and given birth to two Cape Bretoners, she decided to stay and set up her shingle on the Island.

Jen has been working with the New Waterford Collaborative since that time. She has been involved throughout her career in the medical education of all levels of learners, from 1st year medical students, to final year family medicine residents, including clinical practicums for several nurse practitioner students.
