

## **Tips for Certification Upgrading**

The Nova Scotia Department of Education is responsible for all certification and upgrading of teachers. These tips are intended to help teachers best navigate this system.

- 1. Include your professional number of all documents and correspondence. Your professional number is your file reference number and is used to access your records/files at the certification office.
- 2. Send all documents at one time. Do not submit until your application is complete.
- 3. Keep a copy in your own file of everything you send to, and receive from, the certification office.
- 4. Know your stuff. Teacher certification requirements, fees and procedures change. The website, <a href="http://certification.ednet.ns.ca">http://certification.ednet.ns.ca</a>, is the most up-to-date and accurate source of information.
- 5. If you need detailed or more specific information not on the website, contact the teacher certification office by mail, fax or email.
- 6. **Plan ahead**. Before hitting books, ensure that the registrar approves your program of study for certification upgrade.
