**Type of Product:** Software System for Project Management  
**Availability:** Ipad, Mac and iPhone App  
**Website:** [overgantt.com](http://overgantt.com)  
**Download App:** [Apple App Store](#)

Project planners have been using Gantt (bar) charts for over 100 years. OVERGantt (US Pat. Pend.) brings project planning into the 21st century.

Using the world's most advanced digital network diagram, OVERGantt creates plans from right to left using its unique 'endfirst' planning methods.

OVERGantt introduces the world's first project logic verification system - 'OLee' - which ensures the most accurate project plans on the market. Created from the ground up to plan projects virtually, team members around the world can plan as if they were in the same room.

OVERGantt offers the world's first task-based pricing system. Starting with an annual subscription of \$149.99CA, users then purchase project tasks according to the number and size of their projects.

## Use cases include:

Stand alone for small to medium projects (100s of tasks)  
Collaborate with mainstream software for large projects (500+ tasks)

## Future development includes:

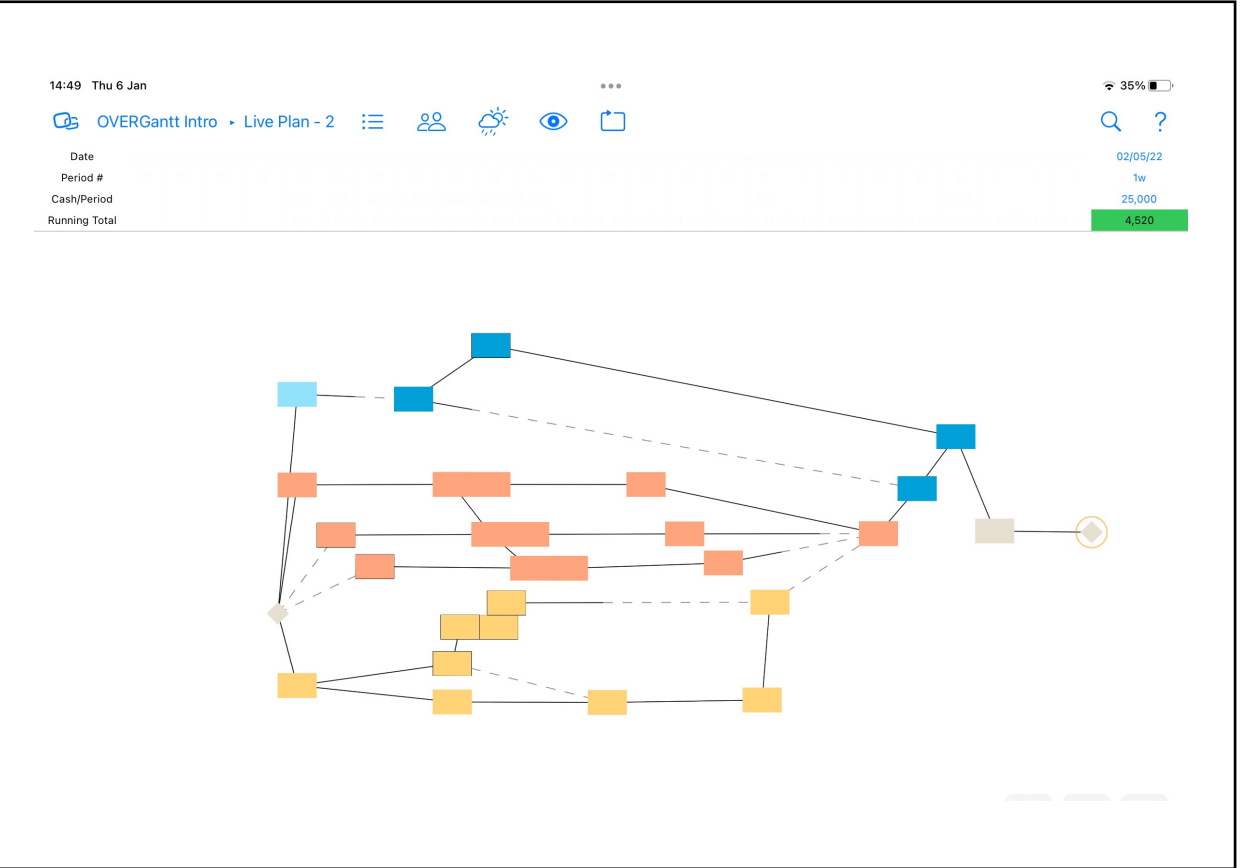

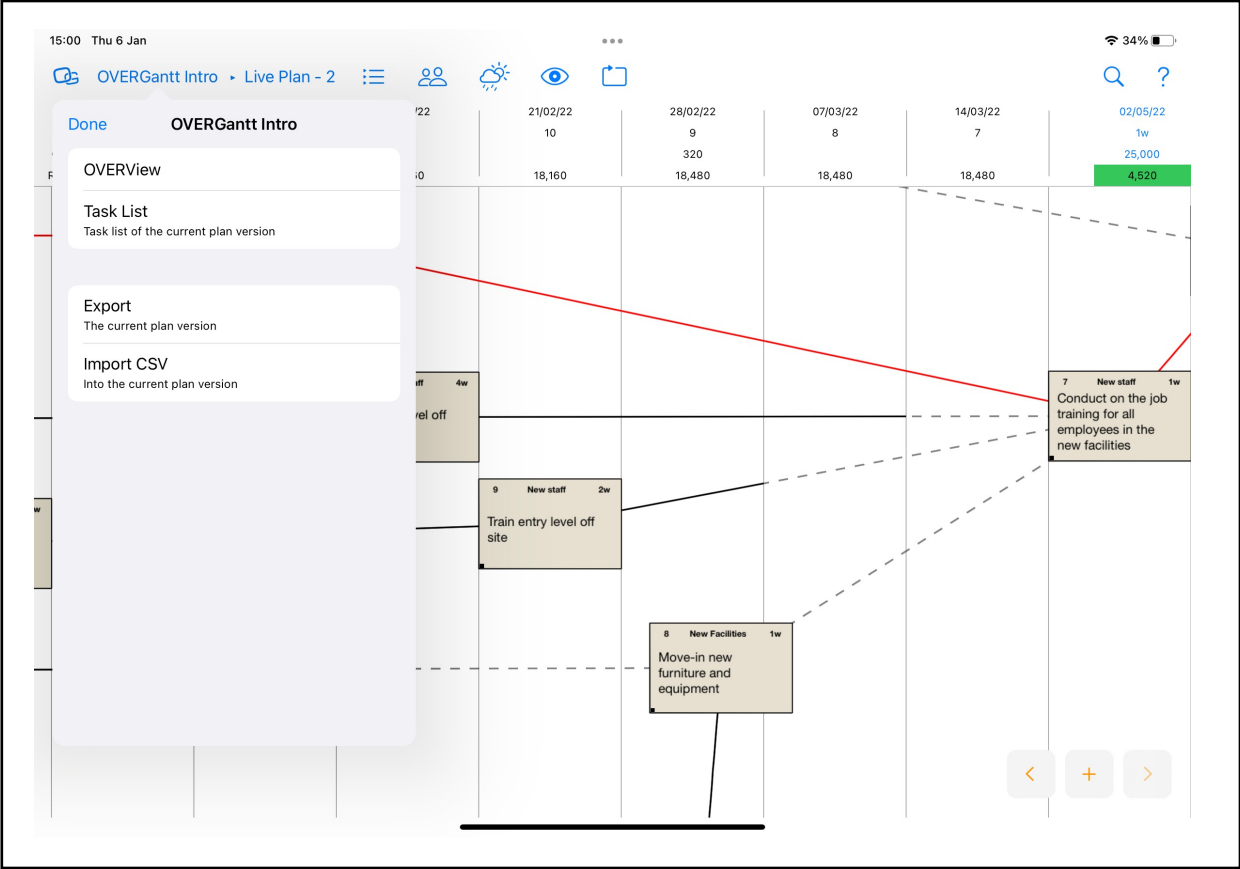

Possibility (risk) analysis integration  
SaaS (software as a service) for web browsers  
OVERHaul - world's first project plan recovery system

## About EndFirst Plans Inc.

Founded 2018 in Halifax, NS, Canada by Alan Uren with offices in Sydney, NSW, Australia. With 30 years of project management experience, including planning, scheduling and controlling representing over \$4 billion worth of project budgets, Alan and Co-founder Wayne Greenwood continue to work with organizations on project management.
