Har Welcome

Tap on a flag to select your first adventure!

When looking for the spot remember you are the blue dot

Keep a finger on the screen to keep it on and active.

When an AR button pops up the game is on . Select AR, now move your phone in a small circle in an area you would like your character/item to appear. When dots appear tap the screen and a character/ item should appear. Dont give up their wicked cool. You can add more, shrink , enlarge or spin them. Even walk right up for a detailed view. When you finished setting your scene, you can take a screen shot with the character.

Now get the story. Follow the map until you get close to the flag. It should open automatically if not a button will appear saying Im here. Tap that button and the story will be revealed.

After you finish your adventure, head over to your chest the items you captured are stored there. Now you can bring them out anywhere.

If you have any question about a particular feature in the app, tap the ? on the top left corner of the map.

Now, lets go on an adventure. Har!
