

Metal Bellows Expansion Joints

TTL Supply specializes in metal bellows expansion joints. We have access to manufacturing capabilities that allow for the production of single, multi-ply and two ply testable bellows which range in sizes from 3/4" - 144" diameter.

Fabric Expansion Joints

TTL fabric expansion joints are engineered to solve thermal growth and vibration problems in air and flue gas systems. We offer numerous single and multi-layered type fabric materials for a range of temperatures and chemical environments.

Rubber & PTFE Expansion Joints

Rubber and PTFE expansion joints are designed to absorb thermal growth motions and vibration in piping systems. We offer an extensive variety of rubber and PTFE expansion joints.

Contact your TTL Sales Representative to discuss how these Expansion Joints can service your industry.
